DROP

Commercial Protection Valve

Protect from Leaks and Conserve Water

Motorized Valve

Transducer

DROP Controller

Flow Meter

Summary

Monitoring pressure, flow, and temperature while also pairing with wireless leak detectors, the Commercial Protection Valve from DROP offers the most all-inclusive leak protection system available.

Features

- DROP App to Remote Control Systems from anywhere
- Local leak detection
- Provides text messages, emails, and/or push notifications of vital system information
- 5-year warranty

Like all DROP systems, the Commercial Protection Valve provides the ability to shut off water automatically when a problem is detected or manually through the app. Its built-in flow meter and pressure sensor can identify a broad range of problems such as continuous flow, leaky toilets, or even very small leaks from a faucet. When paired with DROP Leak Detectors through the DROP Hub, this system provides for every method of leak detection available. In addition to all the benefits associated with preventing costly water damage, the system provides a lot of useful data to aid in water conservation.

DROP Leak Detectors

Place DROP Leak Detectors under sinks and dishwashers, behind toilets or washing machines, near your water heater, or anywhere that water might leak or collect. If a leak or freezing temperature is detected, the Leak Detector will have the DROP Commercial Protection Valve turn off your water.

Models	Service Flow Rate	Pipe Size
D-CPS-15-K1	0.5 to 65 GPM	1.5"
D-CPS-20-K1	1.5 to 130 GPM	2"
D-CPS-30-K1	3.5 to 310 GPM	3"

The DROP Hub

The Commercial Protection Valve requires the function of the DROP Hub. The hub is the connection to everything on the DROP Smart Water Management system. It integrates all of your water devices together.

The DROP Remote

This unique device is an excellent accessory with any other DROP product. This smart remote lets you turn on/off your water with a convenient button, notifies you of new system status events, and extends your wireless DROP-Link network.

The DROP Leak Detector

Never worry about frozen pipes, unusually high water bills or a soaked kitchen. These inconspicuous water-saving devices integrate with our smart water monitoring system to safeguard your facility.
