SOLUTIONS

Keep Leaks on Lockdown.

Leak Detector and Automatic Shut-Off Valve

**Learning Leak
Detection**

**Remote, Manual
and Automatic
Water Shut-Off**

**Live 24/7
Monitoring**

Protect. Save. Control.

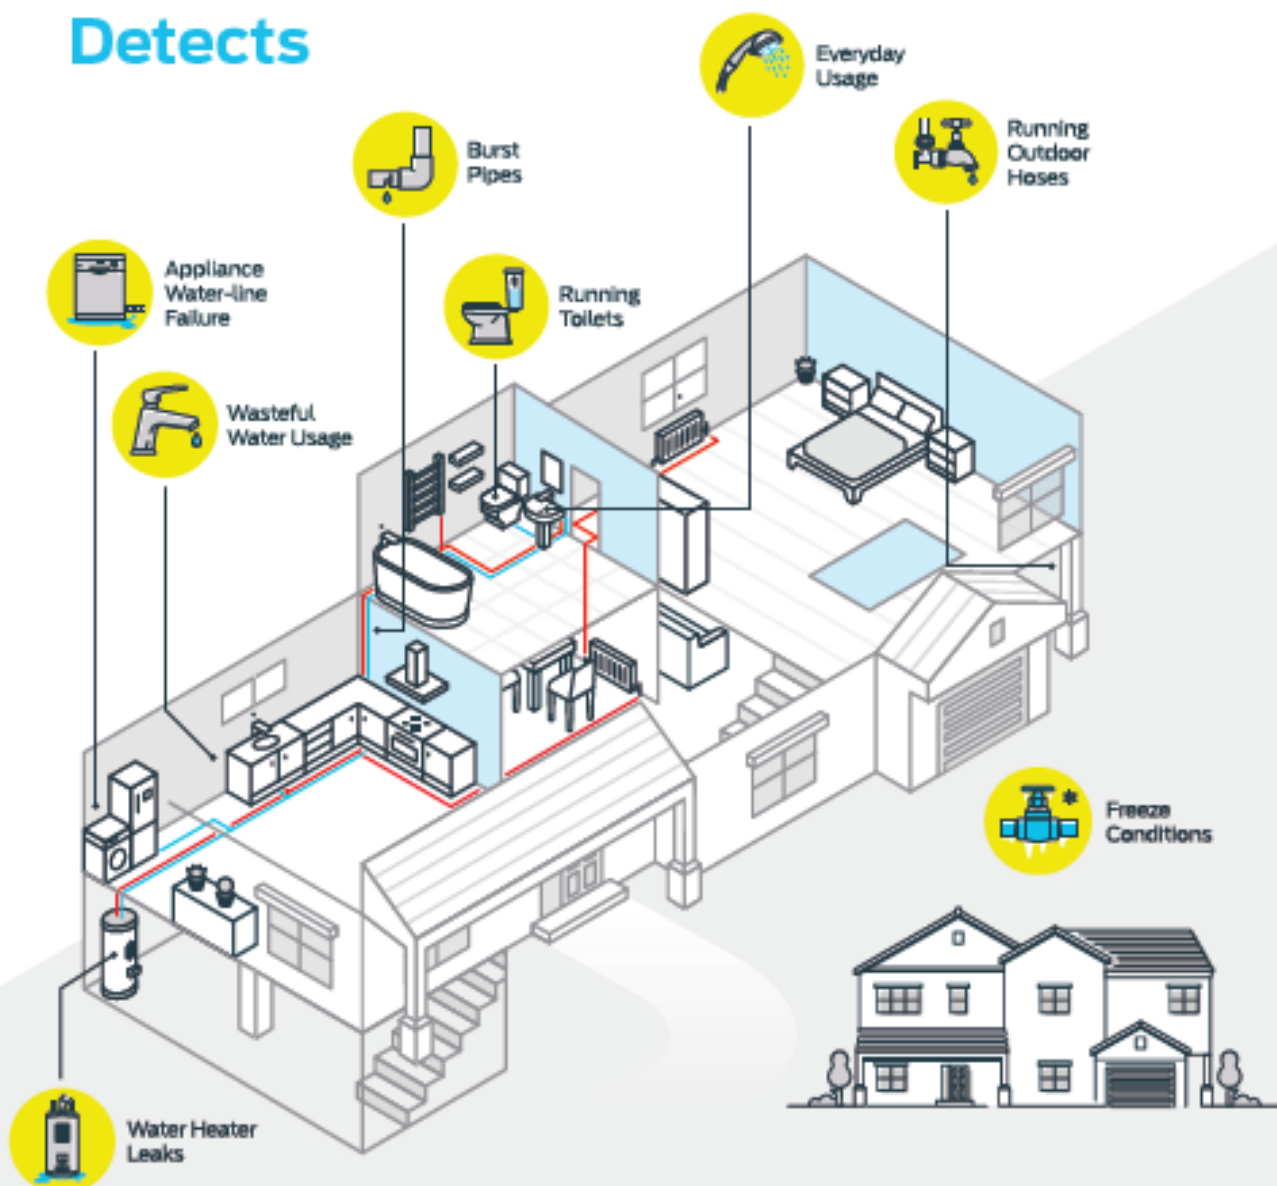

Protect your home from water leaks

Save money on insurance and monthly water bills

Control water usage and efficiency in your home

Always stay one step ahead of leaks whether you are home or away. The StreamLabs Control features patented ultrasonic technology for real-time water monitoring, accurate leak detection, and automatic shut-off valve to quickly stop leaks. Installing a StreamLabs Control will protect your entire home from costly water damage and insurance claims, as well as provide live data of water usage through the free StreamLabs app.

StreamLabs Detects

Easy to Connect & Use

Connect the StreamLabs® Control to Wi-Fi and receive immediate water monitoring and leak alerts from the StreamLabs App, whether you're home or away.

Learning Leak Detection

Use Smart Alerts™ to automatically detect your unique water usage patterns or create custom leak alerts.

Automatic Water Shut-Off

Automatically shut off the water to the house within 15 seconds of detecting a leak.

Real-Time & Accurate Data

Receive instant notification for abnormal water use, along with comparative and historical water usage data. Can detect leaks as small as 0.1 GPM.

Home & Away Modes

With custom leak alert settings, you're protected whether you're home or away.

Complete Your Smart Home

Integrates with Amazon Alexa and Google Assistant.

No Recurring Fees

The free App has an easy-to-read interface with all of the information you need on one screen.

Second Home Protection

You can install multiple Controls on one App for complete visibility and control of water activity at all properties.
